

Project ORION — Claim Control & Lexicon Matrix

Mandatory Wording, Evidence Classification & Prohibited Phrasing Standards

REF: docs/acquisition/presentation/08-CLAIM-CONTROL-MATRIX.md
BASELINE COMMIT: d5908d0a0cc2feff99fa02573adb12b8eea33782
CLASSIFICATION: Confidential – Technical Due Diligence

GOVERNANCE & CLAIM ACCURACY STANDARD

STRICTLY PROHIBITED PHRASING ENFORCEMENT

CORE CLAIM CONTROL MATRIX (PART 1)

Feature / Metric	Evidence Classification	Mandatory Safe Buyer Wording	Strictly Prohibited Phrasing
4,260 Tests	Historical Evidence	"Documented historical test baseline of 4,260 automated tests across 103 suites."	"100% bug-free", "zero-defect codebase", "currently passing"
99.4% Coverage	Historical Evidence	"Documented historical test coverage of 99.4% across domain modules."	"Universal test coverage", "flawlessly tested"
~7.2s Restore	Historical Evidence	"Demonstrated restoration benchmark of ~7 seconds across 29 tables in test container."	"Certified disaster recovery", "guaranteed 24h RPO"
\$100,000 Balance	Current Invariant	"Initial virtual paper trading balance provisioned at \$100,000."	"Real deposited cash balance", "custodial bank funds"
4 Concrete Strategies	Current Invariant	"4 concrete backtesting algorithmic strategy classes in StrategyRegistry."	"0 fully implemented algorithmic execution engines"
9 Strategy Profiles	Current Invariant	"9 strategy parameter schemas defined in API catalogue specification."	"0 running automated trading robots"
7 RBAC Roles	Current Invariant	"7 distinct organization-level RBAC roles."	"Banking governance certification", "statutory roles"
41 Permissions	Current Invariant	"41 granular domain permissions across 14 functional domains."	"Universal security guarantee"
24 API Routers	Current Invariant	"24 modular routers assembled in FastAPI application factory."	"Microservice cluster"
21 Domain Packages	Current Invariant	"21 internal domain packages in modular hexagonal architecture."	"21 standalone external PyPI libraries"

Project ORION — Claim Control & Lexicon

Matrix (Cont.)

Commercial Claims, Execution Boundaries & Universal Statement Governance

PAGE 2 OF 2

CORE CLAIM CONTROL MATRIX (PART 2)

Feature / Metric	Evidence Classification	Mandatory Safe Buyer Wording	Strictly Prohibited Phrasing
18 Dossiers	Current Invariant	"18 closing dossiers in technical due diligence data room."	"Full legal transaction executed"
~\$14/mo Hosting	Configuration Estimate	"Base cloud hosting configured on Render for approximately \$14/month."	"Runs reliably in all workloads for \$14", "guaranteed fixed price"
\$0 Capital Risk	Current Invariant	"Demonstrated execution path uses simulated paper capital only, with \$0.00 live risk."	"Zero financial liability", "risk-free live trading"
Mock Market Data	Simulated Invariant	"Deterministic synthetic market data generated offline by default."	"Live institutional market feed", "real-time broker feeds"
OANDA Practice	External Sandbox	"External broker sandbox adapter supporting OANDA Practice environments."	"Live real-money broker execution clearing"
TwelveData Feed	External Provider	"External market data provider adapter requiring buyer-provisioned API key."	"Built-in active real-time data subscription"
Trading Worker	Disabled by Design	"Autonomous worker coordinator implemented with manual trigger, disabled by default."	"100% automated trading robot active in cloud"
Subscription Pricing	Current Invariant	"Implemented tiers: Free Sandbox (\$0), Pro (\$99), Business (\$299), Enterprise (Custom)."	Preliminary legacy tiers (\$49 / \$149 / \$299)
Commercial Revenue	Not Established	"Revenue, paying customers, and active subscribers are NOT ESTABLISHED IN REPOSITORY."	Any invented ARR, MRR, customer counts, or valuation metrics

UNIVERSAL STATEMENT RULES

- Avoid Unqualified Absolutes:** Never claim "100% ready", "flawless", "zero defect", or "certified" unless citing a specific historical benchmark qualified in text.
- Preserve Simulation Truth:** Distinguish internal simulation (PaperExecutionAdapter, MockMarketDataProvider) from external integrations (TwelveData, OandaBrokerAdapter).
- No Financial Guarantees:** Past backtest or optimization results must never be represented as live market performance guarantees.
- Clean Transaction Boundaries:** Describe the asset as a proposed software and intellectual property transfer, subject to executed agreements.
